

ANNEX I – WHAT IS DATA PRIVACY BRASIL?

Data Privacy Brasil is a space for articulation between two different organizations: Data Privacy Ensino Ltda., founded in 2018, and Data Privacy Brasil Research Association, founded in 2020.

Data Privacy Ensino Ltda¹ was created as a training school. It has extension courses, intensive courses and short courses, offered in person and by distance learning format. It is a for-profit legal entity, due to its structure which remunerates teachers and sells courses.

Data Privacy Brasil Research Association² was created as an institute focused on research and advocacy. Based on an Ethical Financing Policy, the association develops strategic research projects in the protection of personal data, mobilizing knowledge that can help regulators, judges and legal professionals deal with complex issues that require deep knowledge about how socio-technical systems affect fundamental rights. The association is a non-profit civil society organization.
